

Survey: Screen Time & Academic Performance

This survey aims to explore the relationship between students' screen time habits and their academic performance. The collected data will be used to analyze how factors such as daily screen usage, study time, and sleep patterns may influence GPA and overall academic outcomes.

This survey is intended for university students only and will take approximately 3–5 minutes to complete.

All responses are anonymous and will be used strictly for academic research purposes. Please note that while Google Forms may indicate that email addresses are being recorded, we are not collecting or accessing this information—this is simply a default message from the platform.

Thank you for your time and participation!

Any files that are uploaded will be shared outside of the organization they belong to.
